

COMPRESS, NOW

FOR 20 YEARS, we have provided the latest engineering solutions in the field of gas-compression packaging, guaranteeing our customers the exact answer to their needs with traditional Swiss precision. True to our mission, in October 2013 we delivered to IEG ISTROENERGO GROUP a complete compressor station and a gas metering station to supply a GE LM6000 gas turbine, making it possible to realise an important project in Ibese, Nigeria - to supply electricity to the Dangote Cement plant by converting gas into energy.
